

Water leak detector SUCCESS AT-407N

Water leak detection mode :

- Water leak detection from **plastic and metal pipelines** underground **up to 6 m depth**
- Water leak detection **inside the house**

Sensitive acoustic sensor AD allows to find the leak:

-  Under paved and unpaved surfaces
-  By direct contact on the pipeline
-  By placing the sensor against the wall

Features:

-  LCD display
-  Memory of 31 signal level
-  Graphic visualization of the signal
-  Protection from random acoustic noise
-  Light weight
-  Comfortable to wear for long terms

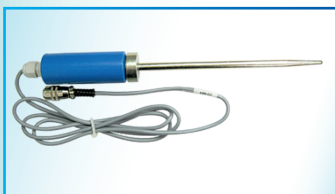

The standard set consists of:

- Receiver AP-027
- Acoustic sensor AD-227
- Carrying rod for AD-227
- Extension carrying rod for AD-227
- Contact rods for AD-227
- Magnet for AD-227
- Holder for AP-027
- Headphones
- Screwdriver
- Manual and passport
- Carrying case

Extra equipment:

Extra equipment:
Acoustic sensor ADM-227
and rod ADM for leak survey at
valves, hydrants and et.ct

Magnetic base of ADM sensor is also used for pipe diagnostics in hard-to-reach places and on the pipes of small diameter.
